

## Metec is reaching to the sky - roof racks are available!

Metec roof rack is fully made from stainless steel, to provide long lasting usage. Finished in electropolish to give a high-quality medical grade look. Products are light due to the stainless steels rigidity but still providing high weight capacity.

Parts are interchangeable and are possible to purchase just details to be able to compile needed rack. But as standard, there are full kits already made.

- Stainless steel, electropolished
- Heavy duty, light weight

Modular system = low freight cost

Spoiler for improved aerodynamics and quiet ride

Roller for ease of use

Open design for easy fixation

# Everything from Metec, from bottom to top.

Metec has been on the accessories market over 25 years. Within this time, we have become a leading OE (original equipment) supplier for majority of European truck manufacturers.

Our goal is to be one stop shop – meaning that all the Accessories can be bought from us. This assures, that all products fit together both functionally and by design.

Running boards Skid plate Towbar Bumper plate Eurobar Ladder Rear step products on the vehicle have unified design. Last few years we have concentrated on functional accessories development and now we are reaching to the sky.

From our wide product range you find also: tow bars, steps for sides and rear, bumper plates, ladders and of course our front products. With these products you can utilize all possible surfaces on the van and make it as usable as possible.
